Oregon Sharpens Cyberdefenses in the Months After DHS Breach

A targeted phishing cyberattack on the Department of Human Services in January compromised 645,000 records and 2 million emails. The agency has been working with the new CISO to fortify its cybersecurity in the months since. READ MORE

How to Simplify Security and Privacy in a Complex Cloud Environment
While multicloud and hybrid cloud computing environments provide compelling benefits for state and local governments, they also complicate the work of preserving data security and privacy. But with a multi-layered, software-defined approach to cybersecurity, agencies can overcome these barriers and work to secure the entire enterprise.
